

Workshop on High Content Screening and Image Analysis for Biosciences

27th-28th Nov, 2018

Organized by THSTI in association with GE Healthcare Lifesciences

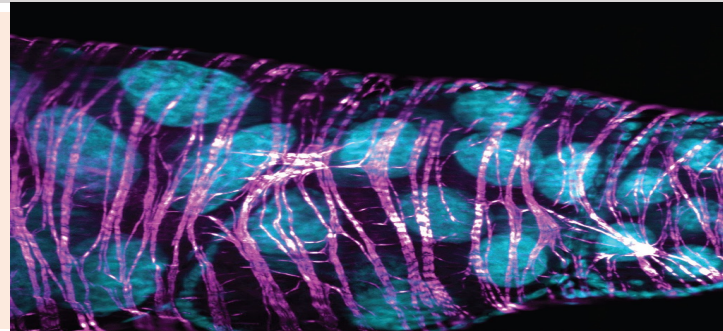

The 2 day workshop on High Content Screening and Image analysis is a comprehensive and intensive course for HCS users/researchers looking for the basis of high-throughput/high-content screening and data analysis. Hands-on sessions will cover equipment demonstrations, experimental designs and image analysis. Scientific seminars with high content screening applications are also included.

The workshop comprises of TWO independent modules each of which will be completed in two days

DAY 1 : MODULE 1

- High content screening- An overview
- High-throughput live cell imaging
- High-content imaging systems and tools
- High-content image analysis - Software

DAY 2 : MODULE 2

- Target and drug discovery
- RNAi high-throughput screening
- Data visualization and analysis
- User data analysis exercise

Application Procedure: A total of 10 trainees will be accepted based on first-come basis.

Registration form and fee (cheque/draft) in favor of _____

Workshop Fee - Rs 3500/- (Academia) & Rs 5500/- for the entire workshop (additional Rs 325/- (Students) and Rs 575/- (Non-Students) for hostel facility including Dinner)

Registration and Fee Deadline : 21st Nov, 2018
