

Recruitment notice no.: THS-C/RN/11/2024

Dated: 30th May 2024

Walk-In-Interview

1. BRIC-Translational Health Science and Technology Institute (THSTI) is an autonomous Institute of the Department of Biotechnology, Ministry of Science and Technology, Govt. of India. The institute is an integral part of the interdisciplinary NCR Biotech Science Cluster located at Faridabad, and is designed as a dynamic, interactive organization with the mission to conduct innovative translational research and to develop research collaborations across disciplines and professions to translate concepts into products to improve human health.
2. BRIC-THSTI has built several inter-institutional collaborations and connectivity with industry supported by well-trained teams of research and laboratory staff. This foundation has helped pursuit of thematic research programmes which can be broadly categorized as, (a) Infectious diseases and Immunology (b) Maternal and Child Health, (c) non-communicable disease (d) Multidisciplinary clinical and translational research. These will be strengthened by four core facilities viz. Small Animal Facility, Data Management Centre, Biorepository and Bioassay Laboratory that will serve not only the research programmes of THSTI, but also the National Capital Region Biotech Science Cluster and other academic and industrial partners.
3. This recruitment is to fill up the vacancies under the projects entitled **“Sepsis-related mortality in neonates in India: A multi-disciplinary, multi-institutional research program for context -specific solutions”** for project positions at Clinical Development Services Agency (CDSA) center. CDSA is a niche center of THSTI established to facilitate development of affordable healthcare products for public health diseases. It is the only public Centre in the country created with a mandate to support and nurture cost-effective, high quality, not-for-profit technology-based preclinical and clinical product development as well as support clinical research conducted by public agencies. It works towards development of an eco-system for training and learning and work with public sector institutions, and small and medium enterprises (SME) to translate innovative technologies into medical products for public good.
The main objectives of CDSA are:
 - a) As an academic Clinical Research Unit, to undertake & provide end -to- end clinical study support for investigators and SMEs in study planning, set up, conduct: project management, monitoring, data management, safety reporting, analysis and report writing
 - b) Build research capacity and capability through high quality training in the area of clinical development/trials and regulation
 - c) Support and strengthen clinical research environment in the country
 - d) Regulatory science and policy support: provide tools and approaches to support researchers, regulators, health policy makers & industry

Walk-in-Interview is being held for eligible candidates to fill up the following positions under “Sepsis-related mortality in neonates in India: A multi-disciplinary, multi-institutional research program for context - specific solutions” DBT, CDSA-THSTI:

1.	Name of the post	Research Officer (Clinical), 1 position
	Location	<ul style="list-style-type: none"> University college of Medical Science, New Delhi Dr. Baba Saheb Ambedkar Hospital, New Delhi Safdarjung Hospital, New Delhi Lady Hardinge Medical College, New Delhi
	Consolidated salary per month	Rs 52,290.00
	Duration	3 months (Likely to be extended)
	Age	18-30 years
	Job profile	<ul style="list-style-type: none"> The Clinical Research Officer will be responsible for: Overall coordination of study at site, supervision and coordination of research staff, ensures supplies, ensures smooth flow of CRFs, ensures data entry of research work Training of nurses and other staff as per the SOP for ongoing monitoring of sepsis, sample collection and recording in the CRF Monitoring the sample collection process by research nurses Independently verify the findings of the research nurses and also the data entered in the CRF. Sample collection at the time of delivery, newborn blood, mother's samples and at the time of suspicion of sepsis. To coordinate with site co-PI/PI for final labelling of culture-positive, culture-negative and no sepsis Supervising the study implementation at site and ongoing QC activities Reviewing protocol deviations and loss to follow up to ensure quality data is delivered Coordinating the data management progress with DM team
	Qualifications and Experience	MBBS/BDS/teaching experience after completing internship OR Ph.D/MD/MDS.
	Skills	<ul style="list-style-type: none"> Computer skills including proficiency in use of Microsoft Office applications Ability to establish and maintain effective working relationships with co-workers, managers, investigators Good understanding of needs for project and job responsibilities Adaptable approach with Effective communication and organizational skills Coordinates the day to day management of the research portfolio

2.	Name of the post	Research Nurse, 01 position
	Consolidated salary per month	Rs.31,500.00
	Duration	3 months (Likely to be extended)
	Age	18-30 years
	Location	<ul style="list-style-type: none"> University college of Medical Science, New Delhi Dr. Baba Saheb Ambedkar Hospital, New Delhi

		<ul style="list-style-type: none"> • Safdarjung Hospital, New Delhi • Lady Hardinge Medical College, New Delhi
	Job profile	<p>The study nurse (round the clock shift duties) will be responsible for:</p> <ul style="list-style-type: none"> • Pre-screening of all mothers for eligibility • Taking consent from eligible mothers • Giving all information about study to parents/Guardians and to explore whether they are interested in participating in the study • Sample collection from mother before delivery (rectovaginal swabs and blood sample), sample collection at the time of delivery (cord blood, cord tissue, vernix) • To fill CRF form for all enrolled mothers and neonates • To monitor the babies for occurrence of sepsis • To collect blood samples, urine, stool, oral and nasopharyngeal swab in neonates with suspect sepsis • To collect breast milk sample from enrolled mothers in the postnatal wards • To follow all the neonates till discharge or 28 days of life whichever is greater • must be able to evaluate the material and work effectively with other researchers • Data collection • To coordinate with lab personnel to transport and process the samples from NICU to the NICU side lab and microbiology lab • Collection of lab results and coordinating with RO for final labelling of sepsis • Coordinate with RO for smooth flow of CRFs.
