

Symposia and Hands-on training workshop

on CAR-T Cell Therapy Manufacturing

3-6 NOVEMBER, 2025

Cell and Gene Therapy Facility, Medical Research Centre,
BRIC-Translational Health Science and Technology Institute

ABOUT THE SYMPOSIA AND TRAINING:

The symposia will feature expert-led sessions on the latest innovations, regulatory frameworks, and challenges in cell and gene therapy. Complementing the talks, the hands-on training workshop will provide participants with direct experience in key manufacturing processes, quality control, and compliance practices. This integrated approach is designed to equip researchers, clinicians, and industry professionals with both the theoretical insights and practical competencies essential for advancing therapeutic development and delivery.

Participants eligibility: Open to Principal investigators, academic scientists transitioning to translational research, clinical trial administrator, clinicians, clinical researchers, lab medical scientists, biotech industry professionals looking to upskill in CGT, RA and QA professionals entering the CGT field.
